

SUCHIR GANESH JAIGANESH

Computer Science Student | AI and Software Engineering

Subang Jaya, Malaysia | +60 13-362 7319 | suchirganesh18102005@gmail.com

Portfolio | GitHub | LinkedIn

EDUCATION

Bachelor of Computer Science | Monash University Malaysia | Jul 2024 - Present

Coursework: Object-Oriented Design, Algorithms, Programming Paradigms, Databases, AI and Data Science.

TECHNICAL SKILLS

Languages: Python, Java, TypeScript, Haskell, SQL

Tools: React, FastAPI, Streamlit, RxJS, Oracle SQL, MongoDB, SQLite, Git, pytest, JUnit, Maven

AI and data: RAG, embeddings, semantic search, NumPy, Pandas, forecasting and data preprocessing

EXPERIENCE

Research Intern | Monash IT Student Research Scheme | Nov 2025 - Feb 2026

Explored sustainable energy analytics through Python preprocessing, forecasting experiments and open datasets.

Founder and Python Tutor | CodeTerinity | May 2025 - Present

Founded a tutoring initiative; designed personalised one-to-one Python lessons, exercises and learning pathways.

Technical Intern | Mechmet Engineers | Nov 2024 - Jan 2025

Completed practical Python, Pandas and NumPy tasks in data manipulation and introductory machine learning.

Marketing and Strategy Intern | TeamWork Global Internship | Jun 2025 - Jul 2025

Collaborated internationally on user research, case studies and campaign strategy across technology and education.

PROJECTS

CareLog | Python, Streamlit, JSON, pytest | GitHub

Led the FIT1056 team and contributed across patient records, appointments, role-based access, password hashing and audit logging. Existing unit, functional and security test suite: 105 tests passed.

EureGuard | React, TypeScript, FastAPI, SQLite, Ollama | GitHub

Built a team hackathon prototype for simulated cloud monitoring, with rule-based scanning, audit logs, human approval flows and local AI explanations.

CodeTerinity RAG Assistant | Python, Streamlit, MiniLM, NumPy | GitHub

Built an offline PDF Q&A pipeline with text extraction, chunking, embeddings, semantic retrieval and local LLM responses.

BNF2Haskell | Haskell, parser combinators, TypeScript | GitHub

Built BNF parsing, grammar validation and Haskell code generation on a course scaffold; added recursion checks and float, Boolean and identifier macros.

BRM Database | Oracle SQL, MongoDB, JSON | GitHub

Developed seven scripts for schema constraints, test data, transactions, service-management extensions, reporting queries and nested JSON/MongoDB operations.

Eclipse Nebula | Java, Maven, JUnit, UML | GitHub

Extended an educational game engine in a team project with modular actors, actions, items and terrain; added tests for selected gameplay behaviours.

Flappy Birb | TypeScript, RxJS, SVG | GitHub

Implemented reactive game state, gravity, collisions, scoring, pause, restart and ghost replay with Observable streams.

LEADERSHIP

Head of Industrial Relations, MUMTEC | Industrial Outreach Lead, MIND ENGINE Expo 2026

Coordinated company outreach, partnerships, sponsorship discussions and student-industry engagement.
